

Statement of Purpose

You have been requested to provide a Statement of Purpose for Genuine Temporary Entrant (GTE) assessment; your response will be used to assess your eligibility to enter RMIT University. Your application may be denied if you do not follow the instructions below.

Instructions:

- Answer all questions
- Use your own original words, do not copy, or generate content from websites or other sources
- Sign and date the declaration on page 4

Section 1: Personal Background

Are you: **Married** ☒ No ☐ Yes, date and year of marriage: _____
 Separated ☒ No ☐ Yes, date and year of separation: _____

In 100 words or less, tell us about you and your family. Do you have family living in Australia? If yes, please describe your relation to them and the type of visa they hold in Australia?

My name is Mohammed Salahuddin. I am currently Studying fourth year of my bachelor's degree in computer science in PDA college of Engineering in Gulbarga-Karnataka. I belong to a nuclear family of four, my father, mother, sister and myself. My father works as an engineer for an overseas company, Sister in her last year of her MBBS, Mother is a Homemaker. No, I don't have any family member living in Australia nor my relative live there.

Section 2: Family Background

In 200 words or less, tell us about your spouse and children (if any).

What is your spouse's highest academic qualification and current occupation? Do your spouse and children intend to accompany you to Australia, if so, what does your spouse intend to do in Australia? Are you aware of visa conditions and extra costs associated with bringing your spouse and/or children with you to Australia? If you are under 18 years of age, will your parents or family member be accompanying you to Australia, if so what type of visa they will be applying for?

No, this condition isn't applicable to me.

Statement of Purpose

Section 3: Education and Employment Background

In 300 words or less, tell us why you have applied for this program, what do you know about the program and its cost, are you aware of additional costs associated with studying in Australia? If this program is not related to your previous studies, why have you decided to change your career path?

I have chosen Masters AI (Artificial Intelligence). Because i have developed a strong interest in machine learning and how it enables machines to learn from data and make informed decisions. By taking this course, I could get to know about emerging technologies and the role of artificial intelligence in solving real-world problems. This program is specialization of Computer Science of Engineering which is directly connected it will allow me to develop advance knowledge and skill. The program could increase the value of my degree and the knowledge obtained from it. While researching the Masters in AI field I came across the RMIT University which provides Two years of Master Program in AI with high class study faculty and its high-end facility and equipment it could develop future career goals. RMIT Master Program covers areas such as machine learning, deep learning, data science, intelligent decision-making and autonomous robotics. This program could help me in developing my career in AI Engineer. I am aware about the program tuition fees and the additional charges required such as insurance, stay, transport and other related expenses to the living in Australia. My parent will fully fund my studies, family and I have carefully planned about the expenses are directly related to my course because my course which is Computer of Science is the foundation of the program which I have chosen. IT is the direct path to the AI Engineer career goals.

Section 4: Gap in Study

In 200 words or less, tell us about gaps in your study (if any). How long is the gap between your previous study and your intended study at RMIT, explain the reason for the gap. Do you have any previous visa granted or refusal for Australia or any other country? If you have visa history for Australia or any other country, please provide supporting evidence.

There is no gap in my studies. I am currently pursuing Undergraduate Degree at PDA Collage in Gulbarga Karnataka, and I intend to continue my study as soon as I have completed degree. About my visa history I have not received any visa refusals from Australia or any other country. I have been granted a Family visa for Saudi Arabia, which was send by my father who works there.

Section 5: Why RMIT

In 300 words or less, tell us why you have chosen to study at RMIT instead of your home country. Please list other universities in Australia and your home country that you have researched and considered.

I have chosen RMIT University, because the program which I am going to choose that is Masters in AI it could strengthen my technical skills and could also knowledge about the industry which I am going to work. While researching I also came across the study pattern of RMIT which could give me a would support my long-term career development, due to its well-structured program, well balanced of theory, practical projects, industry-oriented learning and the critical thinking and also covers the area of machine learning, deep learning, data science, intelligent decision-making and autonomous robotics which could give me a great experience for the future. RMIT also gives Industrial exposure, connections, real world project applications. Exposure to an international academic environment would broaden my perspective and help me develop a better understanding of global industry practices. I have researched many universities such as IIT Bombay, RV College in India and Monash University, Deakin University, University of Sydney in Australia. Al the University I have researched have a great AI program but accordingly the best fit for me is RMIT University AI Program. Theory and the projects are well balanced in it and exposer for many companies is great. Although India has several well-established universities, I believe RMIT's combination of specialised AI education, practical learning and industry exposure is better aligned with my academic and career goals. I would return to my country with the knowledge obtained from there and could also contribute in my country with my skills.

Statement of Purpose

Section 6: Circumstances in Home Country

In 200 words or less, tell us if there are any current political / civil unrest or economic circumstances in your home country that may have impacted your family and education plan.

My home country is India, and I have not experienced any political, civil or economic circumstances in my country. It is a great place where stability is all ways. There has been no interruption of my studies while I was studying, and there is no difficulty in my country about the studies, and my undergraduate studies have gone normally. My Family has all ways supported to my education; priority is given to education. My family is committed the funding of my study; they have planned the finance of the living and education accordingly. And we have well balanced and stable family, and I have a great commitment to study AI program in RMIT University to improve the knowledge.

Section 7: Career Progression and Financial Benefit

In 200 words or less, tell us about your career pathway and intentions after you graduate from this program. How much do you expect your monthly salary to be when you return home with an Australian qualification? How does this compare to the salary you would receive if you studied in your own country? How do you intend to achieve this goal and what is your incentive to return home?

After completing my Masters of AI, I would like to return to my home country India. I intend to apply for AI Engineer positions in multinational companies in India. By having an Australian master's degree my expected salary would be around RS 100,000/month to RS 120,000/month as an entry-level professional. If, I complete my studies in my home country the salary would be around RS 50,000/month to RS 70,000/month I expect the knowledge and practical skills gained through my RMIT qualification to strengthen my competitiveness in the Indian job market. I intend to achieve this goal by developing my technical skills and problem-solving skills in while studies, and I would like to return to home country and contribute the knowledge and skills I obtained from master's degree in the professional sector. In the longer term, I am interested in Establish startup in India and contribute to the country's development. I intend to establish my career in my home country.

Section 8: Post Study Plan

In 100 words or less, tell us where you intend to permanently live and work when you complete your degree. If you intend to work temporarily in Australia once you complete your degree, which visa subclass you intend to apply for to work in Australia?

I am intended to permanently live in My Home-Country after my Graduation in AI program. I am intrusted to work in Multinational companies as an AI Engineer. The skill and the knowledge obtain, I will apply to solve the problems present in the society to make their life easy. I would return to India because I have and long-term career plan in Multinational companies, also want to start a start-up. If I could get chance to work in Australia, I would take (subclass484) visa which grant work in Australia after study and after ginning experience I would return to India.

Section 9: Declaration

I declare that I have written this statement of purpose myself, I have not had assistance writing this and the information provided is my own work. I declare that I am a genuine student and a genuine temporary entrant to Australia. I also declare that I have sufficient funds to cover the cost of my tuition fees and living expenses for the duration of my studies.
